

# *We move your bulk...*

The ultimate loading / unloading system for bulk material

A revolutionary mobile system for the loading and unloading of bulk goods into Standard-ISO-Containers by pneumatic conveying.

Filling from a spout into an ISO container

Direct unloading into a bunker

- Use of the capacity of empty standard ISO containers
- Use free capacities
- No special containers required
- Saving of process times of up to 75%

Empty liner after unloading  
- no residues left
